

NayePankh Foundation

Impact Analytics Dashboard — Project Report

Project Overview

The NayePankh Foundation Impact Analytics Dashboard is a multi-page interactive Power BI report built to track and analyze the foundation's social impact across key program areas. The dashboard provides stakeholders with clear insights into donation trends, volunteer engagement, internship applications, and social media reach across 5 major Indian cities.

Tool	Power BI Desktop
Data Type	Demo Dataset — NGO Impact Data
Cities Covered	Bangalore, Chennai, Delhi, Hyderabad, Mumbai
Campaigns	Education Drive, Food Donation, Skill Development, Women Empowerment
Pages	4 Interactive Dashboard Pages
Key Features	Navigation Buttons, Year Slicer, DAX Measures, Gradient Charts

Key Performance Indicators

KPI	Value	Description
Total Donations	5M	Total donation amount across all cities and campaigns
Total Volunteers	15K	Number of volunteers registered across all programs
Total Internships	10K	Total internship applications received
Total Reach	10M	Social media reach across all campaigns
Total Attendees	106K	Total event attendees across all cities
Application Ratio	66%	Ratio of internship applications to volunteer signups

Dashboard Pages

Page	Title	Visuals Included	
1	Executive Dashboard	KPI Cards, Monthly Donation Trend (Line), Donations by City (Bar), Campaign Contribution (Donut), Social Media Reach by Campaign (Bar)	
2	Volunteer Analytics	KPI Cards, Volunteer Signups by City (Bar), Volunteer Growth by Month (Line), Campaign Distribution (Donut), Volunteers vs Internships (Bar)	
3	Internship Analytics	KPI Cards, Applications by City (Bar), Monthly Internship Trend (Line), Applications by Campaign (Donut), Internships vs Social Media Reach (Combo)	

4	Social Impact Analytics	KPI Cards, Reach by Campaign (Bar), Event Attendance by City (Bar), Donations vs Social Media Reach (Combo), Monthly Reach Trend (Line)	
---	-------------------------	--	--

Features Implemented

Navigation & Interactivity

- Professional navigation buttons on all 4 pages for seamless page switching
- Active page highlighting — current page button appears dark, others light
- Year slicer for filtering data by 2025, 2026, or 2027
- City and Campaign slicers for cross-filtering all visuals

Design & Formatting

- Gradient blue color scale on city bar charts — darkest for top city, lightest for bottom
- Consistent color coding across all campaign visuals
- Clean donut chart legends at bottom with campaign color indicators
- All KPI cards formatted as whole numbers (no unnecessary decimals)
- Proper axis labels and chart titles throughout all pages

DAX Measures Created

Measure Name	Formula	Purpose
Donations LY	CALCULATE([Total Donations], SAMEPERIODLASTYEAR(...))	Last year donations
Donations % Change	DIVIDE([Total Donations]- [Donations LY],[Donations LY])	Year on year growth
Application Ratio	DIVIDE(SUM(Internship_Applications), SUM(Volunteer_Signups))	Applications per volunteer
Month Number	MONTH(Sheet1[Date])	For correct month sorting

Key Insights

- Bangalore leads all cities in donation amount at approximately 1M, followed by Hyderabad and Chennai
- All 4 campaigns contribute nearly equally (~25% each) to total donations showing balanced program reach
- Donation trend shows a consistent decline in the last quarter (Oct-Dec) suggesting seasonal patterns
- Women Empowerment campaign achieves the highest social media reach across all campaigns
- 66% Application Ratio indicates strong conversion from volunteer signups to internship applications
- Social media reach is consistent across all campaigns at approximately 2M each

Skills Demonstrated

Category	Skills
Data Visualization	Power BI — Line, Bar, Donut, Combo charts
DAX Formulas	CALCULATE, DIVIDE, SAMEPERIODLASTYEAR, FORMAT, MONTH
Dashboard Design	Navigation buttons, Color theory, KPI card layout
Data Formatting	Percentage formatting, Decimal control, Axis labels
Interactivity	Slicers, Cross-filtering, Page navigation, Drill-through
